Current Projects:

- POTION (Promoting Social Interaction through Emotional Body Odours) is an EU funded project that aims to understand the nature of chemosignals in humans and their sphere of influence on social interaction.
- The objective is to decode meaningful social interactions by combining new knowledge about the chemical composition of human social chemosignals with a novel olfactory-based technology to drive social behaviour.
- POTION aims to establish healthy social relationships through trust, leading to an overall improvement in wellbeing.
- Feel-ING srl has developed an innovative computer controlled olfactometer system for odour delivery in collaboration with the University of Pisa.
- Feel-ING srl has developed a physiological monitoring platform
- POTION has an Overall budget of € 6 560 150
- Feel-ing has a € 367 250 budget

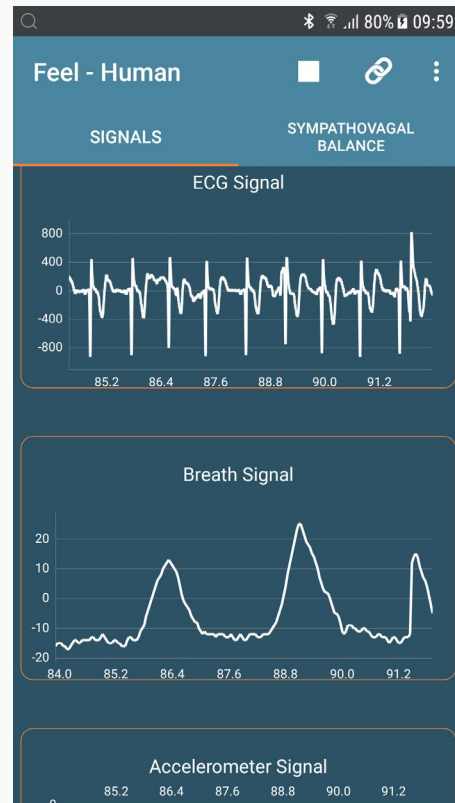

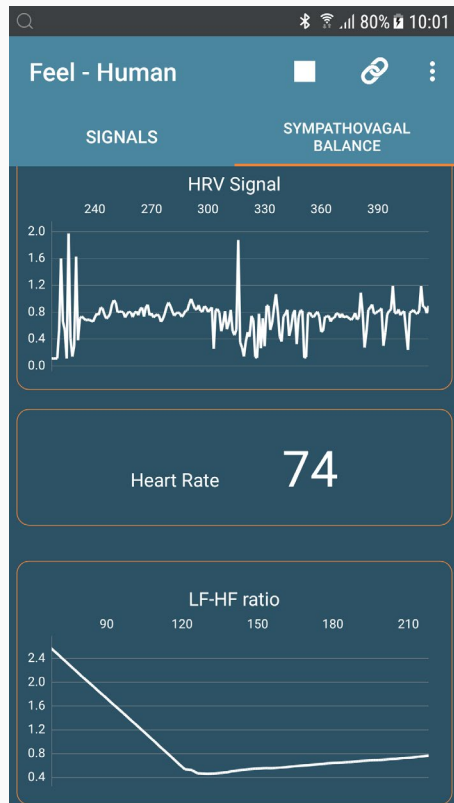

Grant agreement ID: 824153
potionh2020.com

Current Projects:

Mobile application development

Development of multi-system mobile applications for well-being promotion and mental health

Innovative solutions for animal physiological signal monitoring
