

NetResults Srl, founded in 2006 as a spin-off of the University of Pisa, is active in the production of ICT systems for digital transformation in companies, with a view to Industry 4.0 and Smart Working, strongly oriented to research and development.

In addition to the range of Kalliope VoIP PBXs, launched on the Italian market in 2008 and designed for both System integrators and Service Providers, the company designs and develops platforms and solutions to improve the Quality of the IT service experience (Testing&Monitoring).

NetResults is able to offer customized design solutions (from desktop to carrier grade) and professional services of the highest technical and scientific level.
